

Disabled Access Information:

Blackberry Barn

Blackberry Barn is more suitable for disabled access than our Bramble Barn. It is all on one level and has a wooden ramp for easy access to the property with a small lip at the entrance door. It has a very spacious living area and a corridor that is big enough to accommodate a wheelchair.

Blackberry Barn also has a large wet room, there are no rails and the space around the toilet is a little limited but you can fit a wheelchair in the wet room and you would be able to turn. It only has one bedroom but the bedroom is huge, making it easy to access with a wheelchair.

Please see below some photos of the equipment we have available which may be used to assist you during your stay. There are also lots of photos on our website (www.escape2huntingford.co.uk) which may help you with your decision. (We have had many disabled guests stay with us that haven't encountered any problems but it really does depend on the individual and their specific needs.)
